

LIQUID SOLUTIONS

EXPERTS IN LIQUIDS PROCESSING FILTRATION AND BOTTLING

Product ref. **WR – 02**

Date: 20/08/16

Cardboard trays are filled with bottle/jars on the infeed platform of the machine, then a sheet of shrink-film is laid over the pack and tucked underneath. A lever operates a hot wire to cut the film, then the pack is pushed onto the conveyer

The heat tunnel softens the plastic, which shrinks onto the pack as it cools on the outfeed conveyer.

Economical and easy to operate. Automatic machines are also available on request.

Speed 3 – 5 packs per minute

Dimensions:

Eco 500

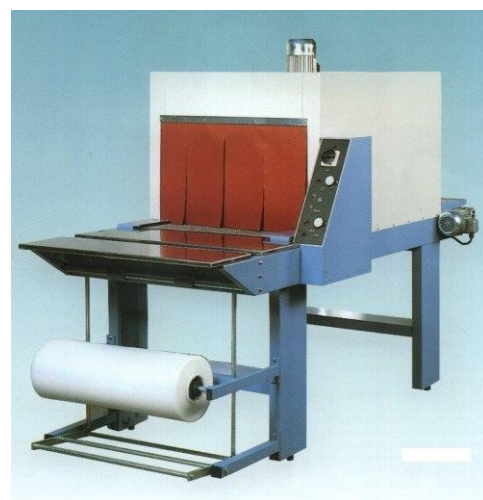

Tunnel entrance 47 x 33cm (max pack height 28cm)

Overall 190 x 80 x 150cm

Eco 650

Tunnel entrance 61 x 44cm (max pack height 38cm)

Overall 260 x 110 x 170cm

Example prices:

Eco 500

£6,895

Eco 650

£8,995

2 – metre outfeed roller conveyer

£445

Prices exclude delivery, commissioning and VAT
